

FRAME FR™

EXTERNAL SUPPORT FOR HIGH-FLOW & ANEURYSMAL AV FISTULA RECONSTRUCTION

↔ Up to 20cm ∅ 4.6 - 8.0mm Models: 6

Product Description

FRAME FR introduces a new approach for repair and stabilization of high flow and aneurysmal AVF. Deployment of FRAME FR over a reconstructed venous segment reduces and maintains AVF flow within desired range, and prevents re-dilatation.

FRAME FR Models

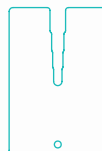

FRAME FR Model	Vein External Diameter	10cm	20cm
∅B	4.6 - 5.5mm	FG078	FG081
∅C	5.6 - 6.5mm	FG079	FG082
∅D	6.6 - 8.0mm	FG080	FG083

 Can be cut to perfectly fit the graft length

Accessories

FRAME Selection Tool

A reusable tool for the assessment of vein graft diameter, intended for proper selection of the relevant FRAME FR model.

Product Number

FG073

VGS Olive Cannula

A reusable cannula for easier implantation of the FRAME FR device over the vein graft.

Product Number

FG013

FRAME FR Mandrel Set

A set of three reusable mandrels for the reconstruction of the vein segment while maintaining effective lumen. The mandrels are compatible with the FRAME FR models.

Product Number

FG075
